

Enterprise Storage & Virtualisation

Server and desktop virtualisation can bring tremendous efficiencies to your IT infrastructure and turn your data centre into a flexible and scalable competitive weapon.

Virtualisation is only half the story. if you want to realise the promise of a truly virtualised environment you need to consider storage as part of the solution.

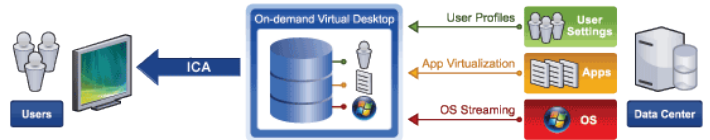

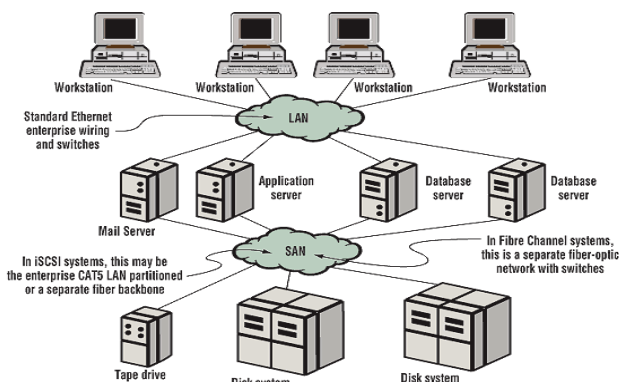

We can provide redundant storage solutions that offer unmatched business continuity and agility; superior application uptime; simplicity of management and break-through value for your business.

Integrating storage as part of your IT strategy will enable you to:

- accommodate data growth
- Scale your virtualised environment
- Maintain performance without investing in additional storage
- Maximise staff productivity
- Save power, cooling, and floor space
- Satisfy multiple needs-SAN, NAS, primary storage, and secondary storage-with a single platform
- Deliver business continuity

To meet ever increasing infrastructure demands, you need an enterprise storage system that can support changing IT requirements, accommodate continuous data growth, satisfy application-level service requirements and reduce costs.

To help enable your success, Tecnica will work side by side with you to create a comprehensive portfolio of support and service options that you can tailor to meet the needs of your business.

Citrix XenApp

Citrix XenApp™, a member of the Citrix Delivery Centre product family, is an end-to-end Windows application delivery system that offers both client-side and server-side application virtualisation. With this secure application architecture, organisations can centralise applications and data in secure data centres, reducing costs of management and support, increasing data security, and ensuring fast, reliable performance.

XenApp allows IT to deliver secure applications as a service, providing on-demand access to users while affording IT the flexibility to leverage future application architectures. It provides several benefits that make it a strategic system for application delivery.

XenApp provides several industry leading technologies and innovations that improve performance, increase security and drive down the cost of delivering Windows-based applications. The only solution that integrates such a comprehensive set of features, enabling it to become a strategic part of your application delivery infrastructure.

Tecnica—Citrix

Citrix is the global leader and the most trusted name in application delivery infrastructure. More than 215,000 organisations worldwide rely on Citrix to deliver any application to users anywhere with the best performance, highest security and lowest cost.

As a leading Citrix Partner in Scotland we offer our customers fantastic prices on Citrix products and subscriptions and are confident we can beat any other quote you may get for these products.
